FW: TARDIS Data Monitoring Committee, 15 May 2013

---

Dear Philip,

The IDMC of the TARDIS study met on 15/05/13.

We reviewed a detailed summary of the study data.

The unanimous recommendation of the IDMC is that the study should continue without modification.

We are, however, concerned that study recruitment is now falling behind the target set for the HTA funding. We would like to urge the Steering Committee and the investigators to make every effort to improve recruitment into this important study.

Professor Ian Ford

(Chair Tardis IDMC)
