

TARDIS - Working Practice Document No: 021

Change of Principal Investigator

If the Principal Investigator (PI) changes at a TARDIS centre, the following procedure should be completed for UK centres.

A new SSI form will be completed, transferring full responsibility of the trial from the previous PI to the new PI. The only item requiring alteration is the PI's details. The CV of the new PI should be submitted to the TARDIS Co-ordinating Centre (CC) and also an updated signature log.

A copy of the R&D approval letter acknowledging change of PI will be sent by the local centre to the CC.

The CC will complete a substantial amendment form to MHRA & MREC to notify them of the change in PI and once all approvals have been received then the centre can commence recruitment under the new PI.
