22<sup>nd</sup> December 2008

Full title of study:	Safety and tolerability of clopidogrel when added to aspirin and dipyridamole in high risk patients with recent ischaemic stroke: a randomised controlled trial
REC reference number:	08/H1102/112 (new)
EudraCT number:	2007-006749-42

Dear Dr Ruben and colleagues,

Following your letter on the above trial dated 05/12/2008, please find enclosed our reply. The only remaining issue included providing a more complete response to point (h), offering a lay summary of the trial results should the participant wish to request it.

We have adjusted the PIS accordingly (under the heading 'What will happen to the results of the research study?') and will read as follows:

"At the end of the trial you will be able receive a summary of the trial results by contacting the research team on the numbers below, or you could view the results on the trial website ([www.tardistrial.org](http://www.tardistrial.org))."

The changes are highlighted on the enclosed information sheets. We hope that the above response is to your satisfaction and that the trial now meets with your approval.

Yours sincerely

Professor Philip Bath, MD FRCP  
Professor of Stroke Medicine
